Subject: Letter of Appreciation, Red Rocks Parking Lots and Traffic Controls- Phase 1

Mark,

I wanted to pass along my sincere gratitude for a job well done on the Red Rocks Phase 1 project.

While this project was nothing short of a challenge accommodating the fully operational Red Rocks Amphitheater and a large dynamic group of project stakeholders, SEMA exhibited professionalism and competence with high quality project management and personnel throughout the duration of the project. The project manager... and the superintendent... were instrumental in completing this project well ahead of schedule and ensuring that Red Rocks Park was not only open to visitors throughout construction, but the park was well accessible by all patrons. We have visitors from around the world and SEMA never failed to implement the means and methods necessary to ensure the work requiring complete area shut-downs were always open on-time and ahead of schedule. For this consideration and the high quality work performed on Red Rocks Park which is a Colorado Gem and a new National Historic Landmark, we are forever grateful.

SEMA's CM/GC delivery of the project was seamlessly executed with through team work, coordination and collaboration with all personnel involved. The long hours and careful consideration that SEMA invested into the pre-construction phase of the project resulted in a well-executed plan in the field to manage the operation of the venue and park while performing these improvements. Not only was this project delivered well ahead of schedule with, there was also a net budget savings to the City and County of Denver.

The professional competence and dedication you and those in your company, brought to the Red Rocks projects was very much appreciated by the City and County of Denver and our patrons. Thanks again Mark and we look forward to future opportunities to work with SEMA on City and County of Denver projects.

Sincerely,

Stephanie Reed
Project Manager
